Process

# Bindupautra Jyotibrat

Attended VIT Bhopal
Jorhat, Assam, India

## Summary

Sophomore at VIT Bhopal University | BTech in Computer Science
Engineering | Specializing in AI & ML | Aspiring Software Developer

Hey there! I'm Bindupautra Jyotibrat, now in my second year of
BTech at VIT Bhopal University, specializing in Artificial Intelligence
and Machine Learning. With a year of foundational learning behind
me, I'm diving deeper into the fascinating realms of AI, ML, and
software development.

As I explore new technologies, my interest has only grown stronger.
From coding algorithms to working on AI-driven projects, I'm
constantly expanding my knowledge and honing my technical skills
to create impactful solutions.

# Outside of academics, football keeps me grounded, while my
love for art and music helps me think creatively. These passions
have taught me teamwork, discipline, and the ability to think beyond
boundaries, all of which fuel my problem-solving approach.

I'm on LinkedIn to connect with fellow tech enthusiasts, industry
professionals, and anyone passionate about innovation in AI, ML,
and software development. I'm always eager to learn from others,
collaborate on projects, and discuss emerging trends in the tech
world.

My goal is to build a strong foundation in AI and software
development, contribute to impactful projects, and stay at the
forefront of technological advancements. Let's connect, collaborate,
and grow together in this exciting journey.
